

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 to 39 (Cancelled)

Claim 40. (Currently Amended) A security combination for a doorway comprising:

a door frame having at least one opening to receive a locking member,

a door sized and shaped to fit within the door frame, the door having a front surface, a rear surface, a top surface, a bottom surface, a free vertical edge portion, and a hinged vertical edge portion, the free vertical edge portion comprising at least one lockset having a portion protruding through the front surface of the door and having a locking member,

a first U-shaped reinforcing member consisting of a base member and two substantially perpendicularly positioned side members, the first U-shaped reinforcing member capable of being securely affixed to the free vertical edge portion of the door, said first U-shaped reinforcing member ~~comprising-being made of~~ a metal material, extending substantially along the full length of the free vertical edge portion of the door, the base member having at least one opening for passage of the locking member from the at least one lockset having a locking member, and ~~comprising a base member and two substantially perpendicularly positioned side members,~~ each of the side members being flat and generally rectangular and extending substantially along the free vertical edge portion of the door and having a proximal edge connected to the base member and a distal edge, wherein the distal edge of each of the side members does not extend in a horizontal direction from the free vertical edge portion towards the hinged vertical edge portion beyond any part of the portion of the lockset protruding through the front surface of the door, and

a second reinforcing member capable of being securely affixed to the door frame, said second reinforcing member having at least one opening for passage of the locking member from at least one lockset having a locking member,

wherein the first U-shaped reinforcing member is over-bend mounted to the free vertical edge portion of the door so that the first U-shaped reinforcing member engages the free vertical edge portion of the door without being screwed to the door, wherein the second reinforcing member has a length of from about 12 inches to substantially the full length of the free vertical edge portion of the door, and wherein force applied against the front or rear surface of the door will be transmitted through the locking member to the second reinforcing member and to the door frame.

Claim 41. (Previously Presented) The security combination of Claim 40, wherein the at least one lockset is a deadbolt locking set and the locking member is a deadbolt.

Claim 42. (Previously Presented) The security combination of Claim 41, wherein the at least one lockset is a door latch set and the locking member is a door latch.

Claim 43. (Previously Presented) The security combination of Claim 40, wherein first and second reinforcing members are each comprised of metal.

Claim 44. (Previously Presented) The security combination of Claim 43, wherein the metal is cold-rolled steel, stainless steel, or brass.

Claim 45. (Previously Presented) The security combination of Claim 40, wherein the U-shaped first reinforcing member is further affixed to the first portion of the door by adhesive.

Claim 46. (Previously Presented) The security combination of Claim 45, wherein the adhesive is silicon adhesive.

Claim 47. (Cancelled)

Claim 48. (Currently Amended) The security combination of Claim 40, wherein the second reinforcing member has a tubular member to receive ~~[[a]]~~ the locking member.

Claim 49. (Previously Presented) The security combination of Claim 40, wherein the door is a metal door.

Claims 50 to 51 (Cancelled)
